3865 Air Dam for FJ Cruiser Platform Rack **INSTALLATION INSTRUCTIONS**

- 1) Position Air Dam at front of rack, with the mounting brackets located **BELOW** the corner plates of the rack.
- 2) Insert four 3/8" x 1" bolts with washers through the holes/slots provided. Place a washer and Nyloc nut on each bolt under the mounting bracket. (Do not fully tighten at this time.)
- 3) Position Air Dam so that there is a constant gap size between the Air Dam skin and the leading tube of the platform rack. Fully tighten all hardware once you are happy with the position/gap. (This gap will provide clearance at the front tube for ropes, straps, and hooks to secure your load. The gap will be approximately 3/4" with the Air Dam positioned completely forward in the mounting slots.)
- 4) Installation is complete.

If you need further assistance installing your product, please contact us by email at customerservice@warriorproducts.com or call us at (888) 220-6861. For more accessories visit www.warriorproducts.com
